EMILY CONNORS   DEVELOPER

Email: ejconnors90@gmail.com   Phone: (303)-217-3874

SUMMARY: Website developer with five years of hands-on experience building responsive and dynamic websites. Strong leadership skills and solid understanding of front-end development.

EXPERIENCE

LEAD CMS DEVELOPER

Simpleview, Tucson, AZ, Jan 2016 - Present

- Hired as a Jr. Developer and rapidly advanced to Lead CMS Developer, June 2018, based ability to meet all technical and team leadership demands.
- Proven technical ability to develop small to large scale website tools and products
  - Completed over 150 website builds, with budgets from 80 to 5,400 man hours using HTML, CSS, Javascript, APIs, Vue.js and more.
  - Assessed UX/UI designs to ensure technical feasibility on Simpleview CMS and products, providing alternative solutions when needed.
  - Developed custom-built solutions to meet client needs which expanded the capabilities of our CMS platform.
  - Within my first year at Simpleview I introduced new procedures for content coordinator role, which improved consistency and accountability. These procedures were adopted company-wide and are in use today
- Proven ability to lead a development team
  - As Lead CMS Developer of a 6-man team, acted as point of contact for all product related issues for over 50 website build projects with licensing contracts up to $70,000 annually.
  - Coordinated with multiple departments including project managers, creative design, product development, digital marketing and content teams in day to day support of Simpleview client websites, powered by SaaS CMS platform, from design concept through deployment.
  - Demonstrated competencies in training and mentoring. Trained five new employees who have assumed varied roles within the company.

WEB DEVELOPER

Block Theory New York, NY, Jun 2014 - Jan 2016 (formally The Fox Theory)

- Created the look, layout and features of client websites using WordPress platform with PHP.
- Built The Fox Theory website using HTML, CSS and JavaScript.
- Assisted in company launch by setting up domain and hosting services, email configuration and an online project management system.
